

Real Estate CRM — Role-Based Access & Workflow

1. Permission Types

Before creating the roles, your CRM should have these permission types:

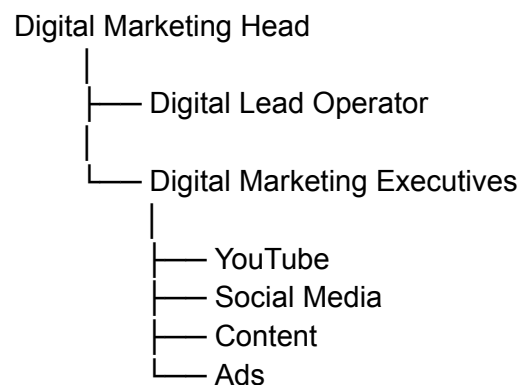

Permission	Meaning
View	View permitted records
Create	Create new records
Edit	Edit permitted records
Delete	Delete records
Assign	Assign leads/tasks/projects
Reassign	Transfer ownership
Approve	Approve workflow requests
Reject	Reject workflow requests
Export	Export data
Import	Import bulk data
Manage	Full control of a module
Report	View/generate reports
Configure	Change settings
Audit	View activity history

2. Recommended Organization Hierarchy

Telecallers → report to Marketing Director

For the Digital Marketing department:

The DMM should be able to decide **which DME owns which digital responsibility**.

3. MANAGING DIRECTOR

Role

Managing Director / MD

Permission

Module	Permission
CRM	Full View + Edit
Leads	View + Edit + Assign + Reassign
Customers	View + Edit
Projects	View + Edit + Approve
Sales	View + Approve
Marketing	View + Approve
Digital Marketing	View + Approve
HR	View + Approve
Finance	View + Approve
Channel Partners	View + Approve
Reports	Full
Tasks	Create + Assign + Monitor
EMS	Full Management
Audit Logs	Full View

Action

MD can:

- View company-wide data
- Edit records where required
- Assign tasks
- Assign responsibilities
- Approve/reject requests
- Set departmental targets
- Monitor employee performance
- Monitor sales
- Monitor marketing
- Monitor leads
- Monitor projects
- Monitor channel partners
- Review customer complaints
- Review daily reports
- Review CRM/EMS activity
- Create management tasks
- Reassign work
- Escalate issues
- Approve important business decisions

Data Scope

Organization-wide.

All Employees
All Leads
All Customers
All Projects
All Sales
All Marketing
All Campaigns
All Channel Partners
All Agents
All Finance
All HR
All CRM
All EMS

Conditions — What Should Not Show

Even MD should not see technical secrets directly:

- Passwords
- API keys
- Authentication tokens
- Database credentials
- Encryption keys
- Payment gateway secret keys

These should be accessible only through secure system administration procedures.

Workflow Involvement

Company Strategy

Department Targets

Task Assignment

Department Execution

Daily Reports

Performance Review

Approval / Corrective Action

Not To Be Shown

No business data should be hidden from MD by default, except technical credentials/secrets.

4. MARKETING DIRECTOR

Role

Marketing Director / Director – Marketing & CRM Operations

Permission

- View CRM
- View all leads
- Edit lead information
- Assign leads
- Reassign leads
- Assign tasks
- View customers
- View project managers
- Monitor sales pipeline
- View site visits
- View customer feedback
- Approve operational requests
- Generate reports
- Monitor CRM usage
- Monitor EMS usage

Action

- Monitor telecallers
- Monitor Project Managers
- Assign work
- Review follow-ups
- Review lead conversion
- Review customer timelines
- Monitor site visits
- Review daily reports
- Track lost leads
- Track pending leads
- Escalate delayed follow-ups
- Coordinate with Digital Marketing
- Coordinate with Project Managers
- Monitor customer relationships

Data Scope

All Leads
All Customers
All Project Managers
All Telecaller Leads
All Projects
Site Visits
Sales Pipeline
Customer Feedback
Lead Sources
Lead Conversion

Conditions — What Should Not Show

Should not have unrestricted access to:

- Employee salary information
- Private HR documents
- Payroll
- Bank credentials
- Accounting system configuration
- Ad account passwords
- API keys

Workflow

Lead

Marketing Director monitors this complete sales journey.

Not To Be Shown

- HR confidential documents
 - Employee private information
 - System credentials
 - Financial banking credentials
-

5. HR

Role

HR & Administration Manager

Permission

- Employee View
- Employee Create
- Employee Edit
- Attendance Management
- Leave Management
- Payroll Records
- Payslip Management
- Employee Documents
- Recruitment
- Onboarding
- Performance Records
- Discipline Records
- Task/Work Report View

Action

- Add employees
- Create employee IDs
- Assign departments
- Assign designations
- Manage attendance
- Approve/reject leave
- Maintain payslips
- Maintain employee documents
- Track discipline

- Track attire/dress code
- Track employee requirements
- Maintain employee records
- Generate HR reports

Data Scope

Employee/HR data only.

Conditions — What Should Not Show

HR should not see unrestricted:

- Customer database
- Customer conversations
- Sales negotiations
- Marketing budgets
- Ad account credentials
- Project confidential information

Workflow

Employee Joining

HR Profile

Department Assignment

Attendance

Daily Work

Performance

Payroll

Not To Be Shown

- Customer financial details
 - Sales negotiation notes
 - Marketing strategy
 - Ad credentials
 - API credentials
-

6. ACCOUNTANT

Role

Accountant / Finance Manager

Permission

- View financial records
- Create payment records
- Edit payment records
- Create invoices
- Record expenses
- Track commissions
- Track partner payouts
- Track agent payouts
- Generate financial reports
- Reconciliation

Action

- Record customer payments
- Verify payments
- Generate receipts
- Track outstanding amounts
- Calculate commissions
- Process approved commissions
- Track expenses
- Generate financial reports
- Maintain transaction history

Data Scope

Bookings

Payments

Invoices

Receipts

Expenses

Commissions

Partner Payouts

Agent Payouts

Outstanding Payments

Revenue

Conditions — What Should Not Show

Should not see:

- Employee private HR records
- Performance discussions
- Marketing strategy
- Internal customer conversations unless financially necessary
- Ad passwords
- API keys

Workflow

Booking

Payment

Payment Verification

Receipt

Commission Calculation

Approval

Payout

Not To Be Shown

- Employee confidential HR information
 - Marketing strategy
 - Internal management discussions
 - Passwords/API keys
-

7. TELECALLER

Role

Telecaller / Lead Qualification Executive

Permission

- View assigned leads
- Create call records
- Edit assigned leads
- Add notes
- Schedule follow-ups
- Schedule site visits
- Update lead status
- Qualify leads
- Request assignment to Project Manager

Action

Telecaller can:

- Call customers
- Add call notes
- Update requirements
- Record budget
- Record location
- Record BHK
- Record property type
- Record buying timeline
- Record loan requirement
- Schedule follow-up
- Mark lead qualified
- Mark lead unqualified
- Request Project Manager assignment

Data Scope

Assigned leads only.

Customer Name

Phone

Email

Requirements

Budget

Location

BHK

Property Type

Timeline

Purpose

Loan Requirement

Call History

Follow-up

Lead Source

Conditions — What Should Not Show

Telecaller cannot see:

- Other telecaller's private leads
- Full customer database
- Company revenue
- Employee salary
- Marketing budget
- Commission structure
- Internal management notes

Workflow

NEW LEAD

ASSIGNED TO TELECALLER

CALL

QUALIFICATION

Not To Be Shown

- Other employees' leads
 - Sales commission
 - Financial reports
 - HR records
 - Internal management comments
-

8. PROJECT MANAGER

Role

Project Sales & Relationship Manager

Permission

- View assigned leads
- View assigned customers
- Edit customer requirements
- Manage follow-ups
- Schedule site visits
- Manage assigned projects
- Update inventory
- Update sales stage
- Coordinate with partners
- Coordinate with agents
- Create booking request
- Submit project details
- Submit daily reports

Action

Project Manager:

- Talks with customers
- Handles qualified leads
- Matches customers with projects
- Schedules site visits
- Conducts follow-ups
- Handles negotiations
- Converts leads to sales
- Maintains customer relationships
- Gets new projects
- Collects complete project information
- Provides project details to Digital Marketing
- Coordinates with channel partners
- Coordinates with agents
- Updates CRM

Data Scope

Assigned Leads

Assigned Customers

Assigned Projects

Relevant Inventory

Relevant Partners

Relevant Agents

Sales Pipeline

Site Visits

Customer Follow-ups

Conditions — What Should Not Show

Cannot see:

- Other PMs' confidential customers
- Company-wide finance
- Employee salaries
- HR documents
- Marketing budget
- Ad account credentials
- Internal management notes

Workflow

Qualified Lead

Project Manager

Requirement Analysis

Project Matching

Customer Follow-up

Site Visit

Negotiation

Booking Request

Finance Verification

Sale Closure

Not To Be Shown

- Other PMs' customer details
- Company-wide financial data
- HR information
- Internal management decisions

9. CHANNEL PARTNER MANAGER

Role

Channel Partner & Business Development Manager

Permission

- Create partners
- Edit partners
- Verify partners
- Assign projects
- View partner leads
- View partner performance
- View commissions
- Assign tasks
- Track agents
- Track freelancers
- Approve operational partner activities

Action

- Recruit channel partners
- Recruit agents
- Recruit freelancers
- Verify partner information
- Onboard partners
- Assign projects
- Track partner activity
- Track partner-generated leads
- Follow up with partners
- Monitor partner performance
- Coordinate with PMs
- Submit commission requests

Data Scope

Channel Partners

Agents

Freelancers

Partner Leads

Partner Projects

Partner Site Visits

Partner Bookings

Partner Performance

Partner Commission

Conditions — What Should Not Show

Cannot see:

- Employee salaries
- HR records
- Full company finance
- Other departments' confidential information
- Other partners' private customer data

Workflow

Partner Recruitment

Verification

Approval

Partner Onboarding

Project Assignment

Lead Generation

Site Visit

Booking

Commission

Not To Be Shown

- Employee HR data
 - Company bank details
 - Other partner's confidential customers
 - Internal management notes
-

10. DIGITAL LEAD OPERATOR

Role

Digital Lead Operations Executive

This is the person responsible for controlling the **digital lead intake and distribution process**.

Permission

- View incoming digital leads
- Validate leads
- Check duplicates
- Edit lead information
- Assign leads
- Reassign leads
- Monitor SLA
- Escalate leads
- View lead source
- View campaign information
- Generate lead reports

Action

- Receive website leads
- Receive Google Ads leads
- Receive Meta Ads leads
- Receive landing page leads
- Check duplicates
- Validate lead information
- Check lead source
- Assign telecaller
- Monitor response time
- Escalate unattended leads
- Reassign leads
- Monitor lead quality

Data Scope

Digital Leads
Lead Source
Campaign
Ad

UTM

Landing Page

Timestamp

Customer Details

Lead Score

Assigned Telecaller

Lead Status

Response Time

Conditions — What Should Not Show

Cannot:

- Change marketing strategy
- Change campaign budgets
- Modify ad creatives
- See HR data
- See payroll
- See company financial information

Workflow

Google / Meta / Website

New Digital Lead

Duplicate Check

Lead Validation

Lead Assignment

Telecaller

SLA Timer

No Response?

Escalation

Not To Be Shown

- Ad account passwords
- Marketing budget
- Employee salaries
- HR records
- Company financial data

11. DIGITAL MARKETING HEAD / MANAGER

Role

Digital Marketing Manager / Head of Digital Marketing

This should be a **manager-level role with approval authority**.

Permission

The DMM should have **everything the Digital Marketing Executives have**, plus management and approval permissions.

Module	DMM
Social Media	Full
YouTube	Full
Content	Full
Website	Full
Campaigns	Manage
Digital Leads	View
Marketing Calendar	Full
DME Tasks	Assign
Content Approval	Approve/Reject
Campaign Approval	Approve
DME Assignment	Manage
Reports	Full Digital
Team Performance	Full
Targets	Create/Monitor

Action

DMM can:

- Assign work to DMEs

- Create marketing targets
- Approve posts
- Reject posts
- Approve reels
- Reject reels
- Approve YouTube videos
- Assign YouTube responsibility
- Assign Social Media responsibility
- Assign Google Ads responsibility
- Assign Meta Ads responsibility
- Assign website responsibilities
- Create marketing calendar
- Monitor execution
- Review digital leads
- Review campaign performance
- Review content quality
- Monitor brand consistency
- Approve publishing

Important DMM Function

The CRM should contain:

Digital Responsibility Assignment

Example:

YouTube

↓

Assigned DME: Satish

Instagram

↓

Assigned DME: Anitha

Facebook

↓

Assigned DME: Anitha

Google Ads

↓

Assigned DME: Satish

Meta Ads

↓

Assigned DME: Anitha

Website

↓

Assigned DME: Satish
The DMM can change these assignments.

Data Scope

DMM can see **all digital marketing information**:

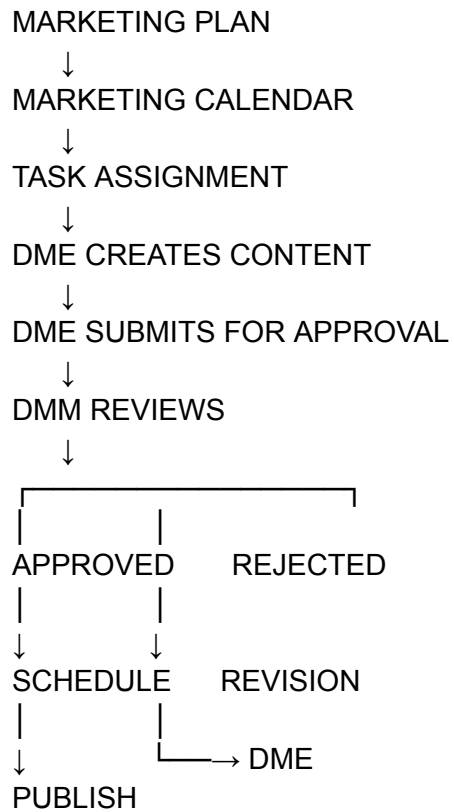

All Digital Campaigns
All Digital Leads
All Content
All Social Media
All YouTube
All Websites
Marketing Calendar
All DME Tasks
Campaign Performance
Lead Sources
CPL
Conversions
Digital Reports

Conditions — What Should Not Show

Should not see unrestricted:

- Payroll
- Employee HR documents
- Accounting data
- Company bank credentials
- Private customer financial information

Workflow

Not To Be Shown

- HR confidential records
 - Payroll
 - Accounting system
 - Bank credentials
 - API keys
-

12. DIGITAL MARKETING EXECUTIVE

Role

Digital Marketing Executive

Permission

- View assigned marketing tasks
- Create content
- Edit content
- Submit content for approval
- View marketing calendar
- View assigned campaigns
- Upload content
- Update task status
- View relevant digital lead performance

Action

Every DME should have daily measurable work.

Daily Target

1 Post

+

1 Reel

+

1 YouTube Short

Additional tasks can include:

- Video editing
- YouTube uploads
- Social media management
- Website project uploads
- Google Ads work
- Meta Ads work
- Creative design
- Content research

Marketing Calendar

The DME should see:

Date

Platform

Content Type

Topic

Assigned DME

Creation Deadline

Approval Deadline

Publishing Date

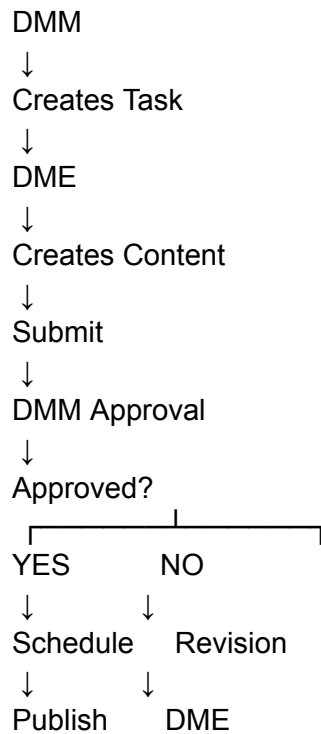

Status

Example:

Date	Platform	Content	Responsible	Status
Aug 10	Instagram	Reel	Anitha	Draft
Aug 10	Facebook	Post	Anitha	Approved
Aug 10	YouTube	Short	Satish	Pending
Aug 11	Instagram	Post	Anitha	Scheduled

Content Workflow

Data Scope

DME sees:

- Their tasks
- Their calendar
- Assigned projects
- Approved project information
- Relevant campaign data
- Their content
- Content approval status
- Relevant digital lead reports

Conditions — What Should Not Show

DME should NOT see:

- Other DME private performance notes
- Employee salaries
- HR records
- Company financial data
- Marketing budget unless specifically required
- Management-level reports
- Other departments' confidential information

Not To Be Shown

- Payroll
 - HR documents
 - Company bank details
 - Private customer information
 - Management notes
-

13. CHANNEL PARTNER

Role

Authorized Channel Partner

This should preferably be an **external portal**, not the internal CRM.

Permission

- Create lead
- View own leads
- View own lead status
- View approved projects
- View project details
- View offers
- View available inventory
- Add project information where authorized
- Request site visit
- View own commissions
- Upload required documents
- Communicate with company

Action

Channel Partner can:

- Add customer lead
- Add customer requirements
- Select project
- View approved project information
- View offers
- View available inventory
- Request site visit

- Track lead
- Track booking
- View commission
- Upload documents
- Update permitted lead information

Data Scope

Own business data only.

Own Leads

Own Customers

Own Projects

Own Site Visits

Own Bookings

Own Commission

Conditions — What Should Not Show

A Channel Partner cannot see:

- Other channel partners
- Other agents
- Internal employees
- Company-wide customer database
- Internal CRM notes
- Internal management reports
- Employee performance
- Company finances
- Other partner commissions

Workflow

Channel Partner

Submit Lead

Duplicate Check

Lead Registration

Project Manager

Customer Follow-up

Site Visit

Booking

Commission

Not To Be Shown

Everything outside their own business activity.

14. AGENT

Role

Registered Real Estate Agent

The Agent can have almost the **same permissions as Channel Partner**.

Permission

- Add lead
- View own leads
- View lead status
- View approved projects
- View offers
- View inventory
- Request site visit
- View booking status
- View commission
- Upload documents

Action

- Add customers
- Submit leads
- Add requirements
- Select projects
- View approved offers
- Request site visits
- Follow up through permitted communication
- View own commission
- Upload documents

Data Scope

Own records only.

Conditions — What Should Not Show

Agent cannot see:

- Other agents
- Channel partners
- Internal employees
- Company CRM
- Internal customer database
- Other commissions
- Internal project notes
- Employee data
- Company financial reports

Workflow

Agent

Lead Submission

Duplicate Check

Lead Registration

Project Manager

Site Visit

Follow-up

Booking

Commission

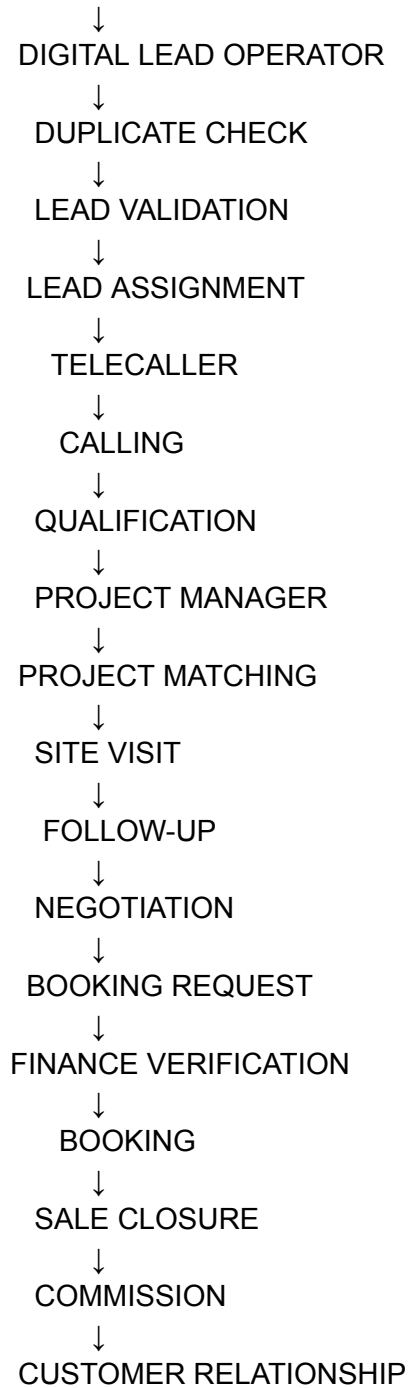

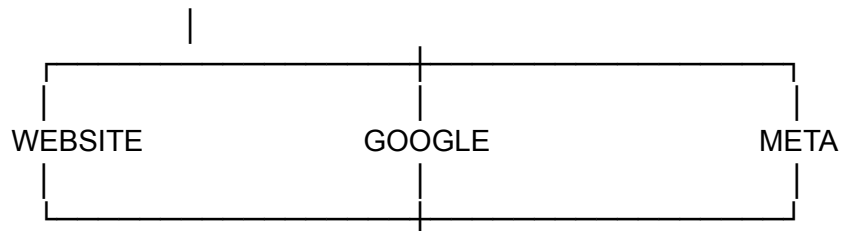

Not To Be Shown

Everything outside the Agent's own leads, projects, bookings and commissions.

15. MASTER CRM WORKFLOW

This is the workflow I recommend implementing in your CRM.

LEAD GENERATION

16. Digital Marketing Workflow

Your CRM should have a **separate Digital Marketing workflow**.

DMM

Marketing Strategy

Marketing Calendar

Create Task

Assign DME

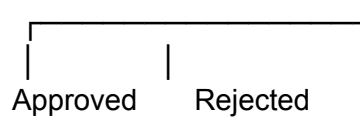

Content Creation

Submit for Approval

DMM Review

Schedule

Publish

Performance

Lead Generation

Digital Lead Operator

17. Marketing Calendar Module

This should be a dedicated CRM module.

Fields

Content ID
Content Type
Platform
Project
Topic
Content Brief
Assigned DME
Created Date
Creation Deadline
Approval Deadline
Publishing Date
Publishing Time
Status
Approval Status
Approved By
Published URL
Performance
Leads Generated

Statuses

PLANNED
↓
ASSIGNED

↓
READY FOR APPROVAL
↓
APPROVED
↓
SCHEDULED
↓
PUBLISHED
↓
PERFORMANCE TRACKING
Rejected:
READY FOR APPROVAL
↓
REJECTED
↓
REVISION
↓
READY FOR APPROVAL

18. Daily Work Requirement Module

Because you are integrating EMS with CRM, each employee should have a **Daily Work Dashboard**.

DME Example

TODAY'S TARGET

- ☐ 1 Post
- ☐ 1 Reel
- ☐ 1 Short

Additional:

- ☐ Campaign work
- ☐ Website update
- ☐ Video editing

Telecaller

Today's Target

Calls: 30

Connected: ____

Qualified: ____

Follow-ups: ____

Site Visits: ____

Project Manager

Today's Target

Lead Follow-ups: ____

Customer Meetings: ____

Site Visits: ____

Negotiations: ____

Bookings: ____

Channel Partner Manager

Today's Target

New Partners: ____

Partner Follow-ups: ____

Agent Follow-ups: ____

Partner Leads: ____

19. Important: Data Scope Rules

Your CRM should have **four levels of data visibility**.

Level 1 — Own

Employee sees only their own records.

Example:

DME

My Tasks

My Content

My Calendar

Level 2 — Team

Manager sees their team's records.

Example:

Digital Marketing Head

All DME Tasks

All DME Content

All DME Calendar

All Digital Leads

Level 3 — Department

Department head sees department-wide information.

Level 4 — Organization

MD sees company-wide information.

20. Field-Level Security

This is extremely important.

Don't just hide entire modules. Some fields themselves need restrictions.

Example:

Lead Record

Field	Telecaller	PM	Marketing Director	MD
Customer Name	✓	✓	✓	✓
Phone	✓	✓	✓	✓
Email	✓	✓	✓	✓
Budget	✓	✓	✓	✓
Lead Source	✓	✓	✓	✓
Campaign	✗/Limited	✗/Limited	✓	✓
Internal Notes	✗	Limited	✓	✓
Commission	✗	Limited	Limited	✓
Financial Data	✗	Limited	Limited	✓

21. Approval Engine

Your CRM should have a centralized **Approval Engine**.
For example:

Content

DME
↓
Submit
↓
DMM
↓
Approve / Reject

Project

PM
↓
Create Project
↓
Submit
↓
Authorized Approver
↓
Approve
↓
Digital Marketing

Booking

PM
↓
Booking Request
↓
Finance
↓
Payment Verification
↓
Authorized Approval
↓
BOOKED

Commission

Partner/Agent
↓
Booking
↓
Finance Verification
↓
Commission Calculation
↓
Approval
↓
Payout

22. Audit Trail — Must Have

Every important CRM action should automatically create an audit record.

Example:

User:

Anitha

Role:

Digital Marketing Executive

Action:

Submitted Reel for Approval

Content:

3BHK Villa – Hyderabad

Date:

08-Aug-2026

Status:

Pending DMM Approval

Another example:

User:

Marketing Director

Action:

Reassigned Lead

Lead:

LD-001254

From:

Telecaller A

To:

Telecaller B

Reason:
No response within SLA

Timestamp:
08-Aug-2026 10:42 PM

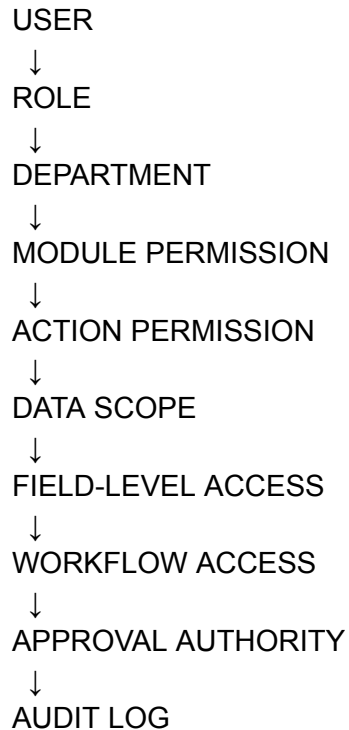

The employee should **not be able to delete the audit record**.

23. Final Role Matrix

Role	Main Access	Data Scope	Approval
Managing Director	Company Management	All	Highest
Marketing Director	CRM + Sales Operations	Marketing/Sales	Operational
HR	HR + EMS	Employees	HR
Accountant	Finance	Financial	Finance
Telecaller	Lead Calling	Assigned Leads	No
Project Manager	Sales + Projects	Assigned Customers/Projects	Limited
Channel Partner Manager	Partners + Agents	Partner Network	Limited
Digital Lead Operator	Lead Intake	Digital Leads	No
Digital Marketing Head	Digital Marketing Management	All Digital Data	Yes
Digital Marketing Executive	Content + Campaign Execution	Assigned Digital Work	No
Channel Partner	External Partner Portal	Own Data	No
Agent	External Agent Portal	Own Data	No

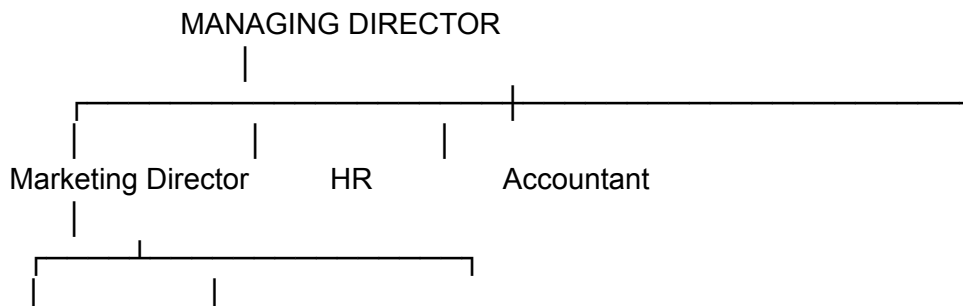

Most important architecture

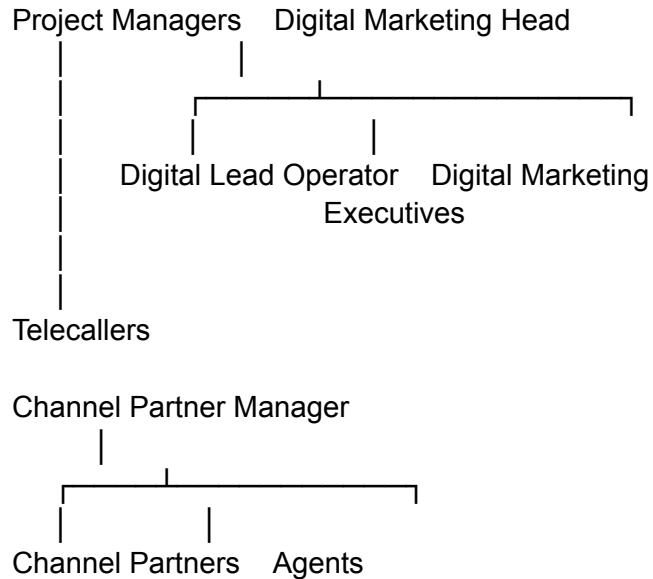

Build your CRM permission system as:

REAL ESTATE CRM — COMPLETE ROLE, PERMISSION & AUTOMATION SYSTEM

1. MASTER ORGANIZATION STRUCTURE

2. CORE CRM PRINCIPLE

Every record in the system should have:

OWNER

RESPONSIBLE PERSON

DEADLINE

APPROVAL REQUIRED?

APPROVER

STATUS

SLA

ESCALATION

NOTIFICATIONS

AUDIT LOG

Nothing should simply sit in the system without an owner and deadline.

3. UNIVERSAL AUTOMATION ENGINE

Create one central **Automation & Workflow Engine**.

It should control:

- Tasks
- Deadlines
- Approvals
- Follow-ups
- Leads
- Customer communication
- Marketing calendar
- Content
- Site visits
- Bookings
- Payments
- Commissions
- Project updates
- Employee tasks
- Channel partner tasks
- Agent tasks
- Customer lifecycle
- Birthday messages
- Festival messages
- Customer nurturing
- Escalations

4. NOTIFICATION ENGINE

Every role should receive notifications according to their responsibilities.

Notification channels

CRM Notification

+

Email

+

WhatsApp
+
SMS
+
Push Notification
+
Phone Call Escalation

The system should decide which channel to use based on urgency.

5. DEADLINE AUTOMATION

Every task should have:

Created
Assigned
Start Date
Deadline
Priority
SLA
Status
Owner
Approver
Escalation Level

Example

A new website lead arrives.

10:00 AM
Lead received

10:00 AM
Digital Lead Operator notified

10:01 AM
Lead assigned to Telecaller

10:01 AM
Telecaller notified

10:06 AM

No action

↓

SLA breached

10:06 AM

Telecaller notification

10:06 AM

WhatsApp notification

10:06 AM

Escalation to Marketing Director

10:06 AM

Task reassigned/escalated according to rules

6. DELAYED TASK AUTOMATION

You specifically want repeated calls every hour.

Build an **Escalation Engine**.

Example

TASK DEADLINE

↓

DELAYED

↓

Notification

↓

WhatsApp

↓

Phone Call

↓

1 Hour

↓

Still Not Completed?

↓

Phone Call

↓

WhatsApp
↓
Escalate to Manager
↓
1 Hour
↓
Still Pending?
↓
Escalate to Department Head

Escalation levels

LEVEL 0

Responsible Employee

LEVEL 1

Immediate Manager

LEVEL 2

Department Head

LEVEL 3

Marketing Director

LEVEL 4

Managing Director

However, **do not literally call employees every hour forever**. Configure maximum escalation attempts, working hours, priority rules and emergency exceptions so the system doesn't create notification spam.

7. ROLE-WISE NOTIFICATION SYSTEM

Managing Director

Notify MD for:

- Major approvals
- Major escalations
- Sales closures
- Lost high-value leads

- High-value customers
- Critical customer complaints
- Major project issues
- Department performance issues
- Missed critical deadlines
- Significant campaign performance changes
- Daily management summary
- Weekly strategy report
- Monthly business report

MD Daily Summary

Send automatically:

Good Morning MD — Daily Business Summary

New Leads: 127

Qualified: 62

Site Visits: 21

Negotiations: 11

Bookings: 4

Revenue: ₹XX

Lost Leads: 18

Uncontacted Leads: 3

Overdue Follow-ups: 7

Digital Leads: 91

Portal Leads: 21

Partner Leads: 15

Top Project: Project A

Top PM: Arun

Top Lead Source: Google Ads

Critical Issues: 2

8. MARKETING DIRECTOR

Notify for:

- Lead assignment

- Uncontacted leads
 - SLA breaches
 - PM follow-up delays
 - Site visit delays
 - Customer complaints
 - Lost leads
 - Booking requests
 - Project information missing
 - New projects
 - Project updates
 - Daily PM reports
 - Customer feedback
-

9. HR

Automatic notifications for:

- Attendance
 - Late arrival
 - Absence
 - Leave requests
 - Leave approvals
 - Missing daily reports
 - Employee birthdays
 - Work anniversaries
 - Employee documents expiring
 - Performance reviews
 - Payroll deadlines
 - Discipline issues
-

10. ACCOUNTANT

Notifications for:

- New booking
- Payment received
- Payment pending
- Payment verification

- Outstanding payment
 - Refund request
 - Commission calculation
 - Commission approval
 - Partner payout
 - Agent payout
 - Invoice deadline
-

11. TELECALLER

Notifications for:

- New lead
- Lead assignment
- Follow-up due
- Customer callback
- Site visit
- Customer response
- Missed follow-up
- SLA breach
- New matching project
- Customer reactivation

Example

NEW LEAD

↓

Telecaller notification

↓

Call customer

↓

Update qualification

↓

Schedule next action

12. PROJECT MANAGER

Notifications for:

- Qualified lead assigned
 - Customer requirement
 - Project match
 - Site visit
 - Site visit reminder
 - Customer follow-up
 - Negotiation deadline
 - Booking request
 - New project
 - Project information request
 - Inventory change
 - Partner lead
 - Agent lead
 - Customer complaint
-

13. CHANNEL PARTNER MANAGER

Notifications:

- New partner registration
 - New agent registration
 - Partner verification
 - Partner lead
 - Partner follow-up
 - Partner performance
 - Partner inactivity
 - Commission request
 - Booking
 - Project updates
 - Partner document expiry
-

14. DIGITAL LEAD OPERATOR

Notifications:

- Website lead
- Google lead
- Meta lead

- Housing.com lead
 - Social media lead
 - Duplicate detected
 - Invalid lead
 - Assignment failure
 - SLA breach
 - Telecaller inactivity
 - Lead reassignment
-

15. DIGITAL MARKETING HEAD

The DMM should receive:

- Marketing calendar deadlines
- Content pending approval
- Content rejected
- Content approved
- Publishing deadlines
- Campaign performance
- Campaign errors
- Lead generation reports
- Website issues
- Social media performance
- DME overdue tasks
- Daily DME reports

The DMM should have the authority to assign:

YouTube → DME A

Social Media → DME B

Google Ads → DME A

Meta Ads → DME B

Website → DME A

Content → DME B

Video Editing → DME A

Assignments should be changeable at any time.

16. DIGITAL MARKETING EXECUTIVE

Each DME should have a **Daily Work Dashboard**.

Mandatory daily tasks

- ☐ 1 Post
- ☐ 1 Reel
- ☐ 1 Short

Additional assigned tasks:

- ☐ Video
- ☐ YouTube
- ☐ Social Media
- ☐ Website
- ☐ Google Ads
- ☐ Meta Ads
- ☐ Creative

Every task gets:

Task

↓

Deadline

↓

DME

↓

Submission

↓

Approval

↓

Scheduling

↓

Publishing

↓

Performance

17. CONTENT APPROVAL SYSTEM

Your requirement should be implemented as:

DME creates

POST
REEL
SHORT
VIDEO
CREATIVE

↓

Submit for approval

↓

Digital Marketing Head reviews

APPROVE
REJECT
REQUEST CHANGES

↓

If approved:

Schedule

↓

Publish

↓

Track Performance

If rejected:

DME receives notification

↓

Reason shown

↓

Revision

↓

Resubmit

I recommend **DMM approval as the publishing gate**, while DME remains responsible for creation and execution. This gives you managerial quality control.

18. MARKETING CALENDAR

Create a dedicated module:

Marketing Calendar

Each item contains:

Content ID
Project
Platform
Content Type
Topic
Brief
Assigned DME
Creation Deadline
Approval Deadline
Publishing Date
Publishing Time
Approver
Status
Approval Status
Published URL
Performance
Leads

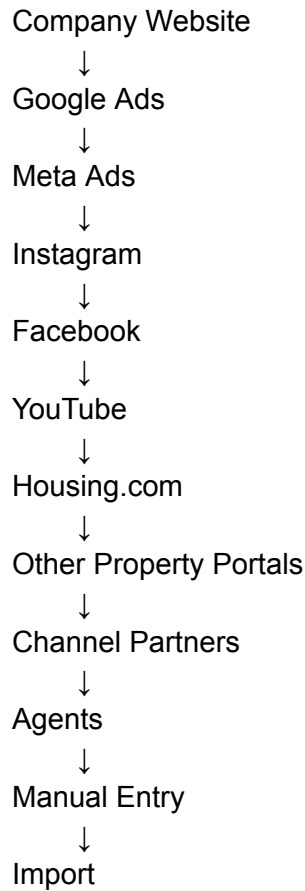

Calendar statuses

PLANNED
↓
ASSIGNED
↓
IN PRODUCTION
↓
READY FOR APPROVAL
↓
APPROVED
↓
SCHEDULED
↓
PUBLISHED
↓
ANALYSIS

19. AUTOMATED LEAD CAPTURE

Your CRM should have a **Lead Integration Layer**.

Leads can come from:

All should enter:

ONE CENTRAL LEAD DATABASE

Portal/API availability will depend on each platform's supported integration or partner access, so the integration layer should support APIs, webhooks, email parsing and approved lead-feed methods rather than assuming every portal provides the same integration.

20. AUTOMATIC LEAD PROCESSING

When any lead arrives:

NEW LEAD

Generate Lead ID

Capture Source

Capture Campaign

Capture UTM

Duplicate Check

Customer Matching

Lead Score

Requirement Extraction

Project Matching

Assign Telecaller

SLA Timer

Notify Telecaller

21. DUPLICATE LEAD ENGINE

Before creating a new customer:

Check:

Phone Number

Email

Name + Phone

Name + Email

Existing Customer

Existing Lead
Channel Partner
Agent

If duplicate:

DUPLICATE FOUND

Existing Customer

Attach New Enquiry

Notify Responsible Employee

Do not create multiple customer records unnecessarily.

22. CUSTOMER QUALIFICATION

The CRM should automatically capture:

Property Type
BHK
Budget
Preferred Location
Purpose
Buying Timeline
Loan Requirement
Family Size
Preferred Possession
Investment/End Use

Then calculate:

Lead Qualification Score

Example:

Budget Match	+20
Location Match	+20
Timeline	+20
Property Match	+15
Loan Readiness	+10

Engagement +15

Total 100

23. IF THERE IS NO MATCHING PROJECT

This is one of the most valuable automations in your system.

Suppose:

Customer wants:

3 BHK

Kokapet

₹1.5 Crore

Buying within 6 months

But you don't currently have a matching project.

Do **NOT** lose the customer.

CRM should automatically:

Customer Requirement

NO PROJECT MATCH

Customer enters NURTURE POOL

Requirement saved

Customer tagged:

"3BHK + Kokapet + ₹1.5Cr"

Future project monitoring

When a matching project enters your CRM:

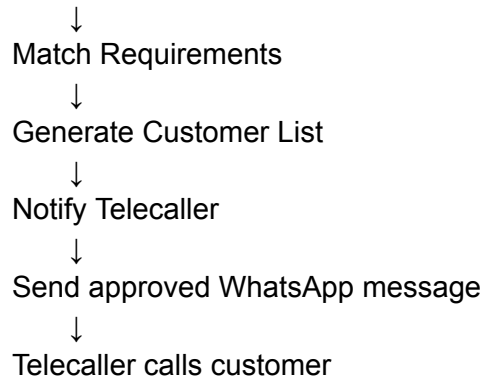

NEW PROJECT

Matching Engine

Find Customers

24. AUTOMATIC PROJECT MATCHING

The system should continuously compare:

CUSTOMER REQUIREMENT
VS
PROJECT INVENTORY

Matching parameters:

- Location
- Radius
- Budget
- BHK
- Property type
- Area
- Purpose
- Timeline
- Amenities
- Availability

Example:

New Project
3 BHK
Kokapet
₹1.4–1.6 Cr

↓
CRM Search
↓
247 matching customers

↓
Segment
↓
Telecaller task
↓
Customer notification

25. CUSTOMER COMMUNICATION AUTOMATION

Create a **Customer Communication Engine**.

Communication events:

Lead received

Lead received
↓
Thank-you message

Lead qualified

Qualification completed
↓
Relevant project message

Site visit

Booking
↓
Reminder 24 hours before
↓
Reminder 2 hours before

Follow-up

Follow-up due
↓
Customer reminder

Project match

Matching project found
↓

26. BIRTHDAY AUTOMATION

CRM stores:

Customer Birthday
Partner Birthday
Agent Birthday
Employee Birthday

On birthday:

CRM

↓

Check today's birthdays

↓

Select approved template

↓

Send WhatsApp

↓

Record message

Example:

Happy Birthday, [Name]! Wishing you a wonderful year ahead. 🎉

The template should be approved once by the authorized marketing approver before automated sending.

27. FESTIVAL AUTOMATION

Create:

Festival & Occasion Calendar

Examples:

- Sankranti
- Ugadi

- Diwali
- Dussehra
- Christmas
- New Year
- Eid
- Independence Day
- Republic Day
- Company anniversary
- Customer anniversary

Workflow:

Festival Calendar

Create Message

Marketing Approval

Schedule

Customer Segment

WhatsApp

28. CUSTOMER LIFECYCLE

Your CRM should track the customer from first contact to post-sale.

LEAD

CONTACTED

QUALIFIED

PROJECT MATCHED

SITE VISIT

FOLLOW-UP

NEGOTIATION

BOOKING
↓
PAYMENT
↓
SALE CLOSED
↓
DOCUMENTATION
↓
REGISTRATION
↓
HANDOVER
↓
POST-SALE
↓
REFERRAL

29. POST-BOOKING CUSTOMER MANAGEMENT

After booking, the CRM should automatically create a **Customer Lifecycle Timeline**.

Track:

Booking
Payment
Documents
Agreement
Registration
Loan
Construction/Project Updates
Possession
Handover
Complaints
Service Requests
Customer Feedback
Referral

The customer record should have one complete timeline:

08 Aug
Lead Created

09 Aug
First Call

10 Aug
Qualified

12 Aug
Site Visit

15 Aug
Negotiation

18 Aug
Booking

20 Aug
Payment

25 Aug
Agreement

30 Aug
Registration

Future
Handover

30. LOST LEAD MANAGEMENT

This is extremely important.

A lost lead should never disappear.

When a lead becomes:

Lost
Not Interested
Budget Issue
Location Issue
Timeline Issue
No Response

Project Unavailable
Competitor

the CRM should require a **Lost Reason**.

Then create:

Lost Lead Database

31. AUTOMATIC LOST-LEAD NURTURE

Example:

Customer lost because:

Budget currently unavailable.

CRM can automatically create:

Reactivation Date:
6 Months Later

Then:

6 Months

↓

CRM Reminder

↓

Telecaller Task

↓

WhatsApp

↓

Call Customer

If a suitable project appears before then:

Matching Project Found

↓

Notify Telecaller

↓

Customer Message

↓

Call

32. SALES PIPELINE ABANDONMENT

If customer stops responding:

No Response

↓

3 Days

↓

Follow-up

↓

No Response

↓

7 Days

↓

Follow-up

↓

No Response

↓

30 Days

↓

Nurture

But the exact intervals should be configurable by management.

33. MD MANAGEMENT INTELLIGENCE DASHBOARD

This is one of the most important parts of your CRM.

MD should not have to manually study thousands of records.

The CRM should summarize everything.

Daily MD Dashboard

TOTAL LEADS

NEW LEADS

QUALIFIED

SITE VISITS

NEGOTIATIONS

BOOKINGS
CLOSURES
REVENUE

Lead Source

Google
Meta
Website
Housing.com
Social Media
Channel Partners
Agents
Referrals

Conversion

Leads
↓
Contacted
↓
Qualified
↓
Site Visit
↓
Negotiation
↓
Booking
↓
Sale

34. LOST LEAD ANALYSIS

MD should see:

Total Lost Leads
↓
Why Lost?
↓
Budget
Location
Price
Project unavailable

No response
Competitor
Loan issue
Timeline
Other

Example:

LOST LEADS

Budget Issue	28%
No Response	22%
Location	17%
Price	12%
Competitor	10%
No Project Match	8%
Other	3%

This gives MD strategic information.

35. PROJECT PERFORMANCE

MD should see:

Project A
Leads: 500
Qualified: 220
Visits: 70
Bookings: 18
Conversion: 3.6%

Project B
Leads: 300
Qualified: 150
Visits: 65
Bookings: 25
Conversion: 8.3%

The CRM can identify:

Project B converts better despite receiving fewer leads.

36. EMPLOYEE PERFORMANCE

MD should receive automated summaries.

Telecaller

Calls
Connected
Qualified
Follow-ups
Site Visits
Conversion

Project Manager

Leads
Follow-ups
Site Visits
Negotiations
Bookings
Revenue
Conversion

DME

Posts
Reels
Shorts
Videos
Approved
Rejected

Leads Generated

Channel Partner Manager

New Partners
Active Partners
Partner Leads
Bookings
Revenue

37. DIGITAL MARKETING PERFORMANCE

DMM + MD dashboard:

Campaign
Spend
Leads
Qualified Leads
Site Visits
Bookings
Revenue
CPL
Cost per Qualified Lead
Conversion Rate
ROI

The goal should be:

Don't optimize only for number of leads. Optimize for qualified leads → site visits → bookings → revenue.

38. CUSTOMER 360° VIEW

Every customer should have one page:

Customer 360

Customer Profile

- Lead History
- Calls
- WhatsApp
- Emails
- Projects Viewed
- Site Visits
- Follow-ups
- Negotiations
- Booking
- Payments
- Documents

- Complaints
 - Feedback
 - Referrals
 - Communication History
-

39. AUTOMATIC DAILY REPORT TO MD

At a configured time every day, CRM should automatically generate:

"Daily Business Intelligence Report"

1. Lead Summary

- New leads
- Source-wise leads
- Qualified
- Unqualified
- Duplicate
- Pending

2. Sales

- Site visits
- Negotiations
- Bookings
- Closures
- Revenue

3. Lost Leads

- Number
- Reasons
- High-value lost leads
- Leads requiring reactivation

4. Employees

- Attendance
- Tasks completed
- Tasks delayed
- Performance

5. Marketing

- Posts
- Reels
- Shorts
- Campaigns
- Leads
- CPL
- Conversion

6. Channel Partners

- New partners
- Active partners
- Leads
- Site visits
- Bookings
- Commission

7. Customer

- New customers
- Complaints
- Feedback
- Birthdays
- Follow-ups

8. Critical Alerts

- ⚠ 5 leads breached SLA
 - ⚠ 3 site visits not followed up
 - ⚠ 2 bookings awaiting payment verification
 - ⚠ 4 marketing posts awaiting approval
 - ⚠ 3 PM tasks overdue
-

40. AUTOMATED STRATEGY INSIGHTS FOR MD

Go one step further.

The CRM should analyze the data and generate:

"Management Insights"

For example:

Insight 1: Google Ads generated fewer leads than Meta but produced a higher booking conversion rate.

Insight 2: 32% of lost leads were caused by budget mismatch.

Insight 3: Project A receives high traffic but has a low site-visit conversion.

Insight 4: Leads from Channel Partners have a higher booking rate than social media leads.

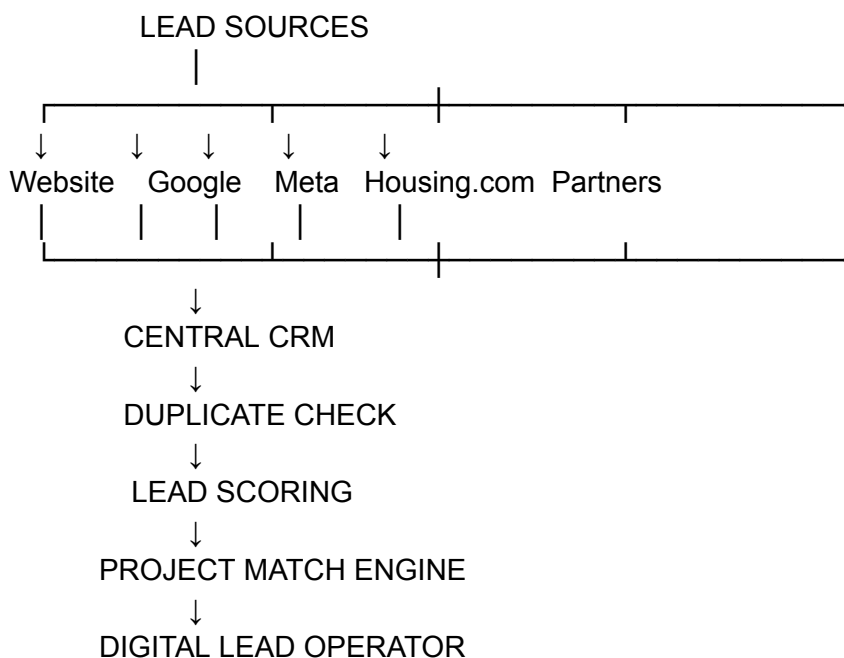

Insight 5: 18 customers are currently looking for 3BHK properties in Kokapet within ₹1.5–2 Cr.

Recommended Action: Increase inventory/project acquisition in this segment.

This is where your CRM becomes a **decision-support system**, not just a database.

41. MASTER AUTOMATION FLOW

Ultimately, your CRM should work like this:

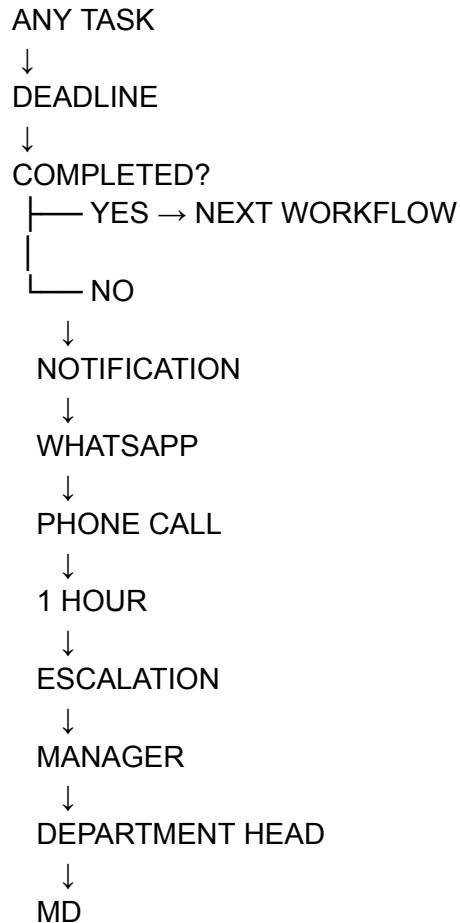

Parallel system:

And:

42. FINAL ROLE + AUTOMATION MATRIX

Role	Main Responsibility	Data Scope	Approval	Automation
Managing Director	Strategy + Management	All company	Highest	Critical alerts + daily/weekly intelligence
Marketing Director	CRM + Sales Operations	Sales/Marketing	Operational	Lead/SLA/customer escalations
HR	Employee Management	Employees	HR	Attendance/leave/payroll reminders
Accountant	Finance	Financial	Finance	Payments/commission/reminders

Telecaller	Lead Qualification	Assigned leads	No	Calls/follow-ups/SLA
Project Manager	Sales + Customers + Projects	Assigned	Limited	Site visits/follow-ups/booking
Channel Partner Manager	Partner Network	Partners/Agents	Limited	Recruitment/follow-up/performance
Digital Lead Operator	Lead Intake/Distribution	Digital leads	No	Capture/duplicate/SLA/assignment
Digital Marketing Head	Digital Management	All digital	Yes	Calendar/approval/team assignment
Digital Marketing Executive	Content + Execution	Assigned digital work	No	Tasks/calendar/publishing
Channel Partner	Lead/Project/Commission	Own records	No	Lead/project/commission
Agent	Lead/Project/Commission	Own records	No	Lead/project/commission

43. THE CRM SHOULD HAVE THESE CORE MODULES

For your developer, I would divide the system into:

01. Dashboard
02. Leads
03. Customers
04. Lead Sources
05. Lead Assignment
06. Lead Qualification
07. Lead Scoring

08. Duplicate Management
09. Project Management
10. Property Inventory
11. Project Matching
12. Site Visits
13. Follow-ups
14. Sales Pipeline
15. Bookings
16. Payments
17. Documents
18. Commissions
19. Channel Partners
20. Agents
21. Telecalling
22. Digital Marketing
23. Marketing Calendar
24. Content Approval
25. Campaign Management
26. Website Leads
27. Portal Leads
28. Social Leads
29. WhatsApp Automation
30. Email Automation
31. SMS Automation
32. Notification Center
33. Call Escalation
34. SLA Engine
35. Approval Engine
36. Task Management
37. EMS
38. Attendance
39. Leave
40. Payroll
41. Daily Reports
42. Customer Feedback
43. Customer Lifecycle
44. Birthday/Festival Automation
45. Lost Lead Management
46. Nurture Management
47. Analytics
48. Management Intelligence
49. Audit Trail
50. Role & Permission Management

The most important architecture

Do **not** hard-code these workflows directly into individual screens.

Build reusable engines:
